🌐 LinkedIn

I have a passion for developing apps that simplify life. Combining my background in design with my programming skills, I aim to contribute to larger projects in this domain. My past career experiences have provided me with valuable insights into this field.

Work Experience

Frontend Developer

Dec 2022 - Oct 2023

🔗 [DoCode](#)

Developed and deployed **ColorwayXpress** using Next.js with a focus on UI/UX optimization. Learned Vue.js to introduce new features and fix bugs in existing company projects. Extensively involved in API integrations.

Self Learning

Feb 2022 - Present

🔗 [Github](#)

Learned **React**, **Next.js**, and **Vue.js**. After acquiring fundamental knowledge of **Three.js**, I am now focusing on specializing in building websites using **WebGL** and **React Three Fiber**. I am also learning **Blender** at an introductory level.

Graphic Designer, Editor, Data analysis

Aug 2016 - Nov 2021

🔗 [Suriye Gündemi](#)

Worked on an impartial platform that disseminates information about Syria. Responsibilities included annotating control zones and essential details onto maps using **Photoshop**. Prepared Excel data for infographic representation and uploaded articles and maps to the website via **WordPress**.

Projects

🔗 [CV Builder](#)

With this project you can create CVs in real time. You can see your changes live. Changes are saved to your **local storage**. Built with **Next.js**, **TailwindCSS** and **ContextAPI**.

🔗 [halid.dev](#)

My personal website, that I created with **Next.js**, **TailwindCSS**, **Content Layer**.

🔗 [Weather App](#)

This is a small project where I visualize the data obtained with the API provided by **OpenWeatherMap**.

🔗 [Hikarix](#)

Built with **Next.js** and **TailwindCSS**, this project features **R3F (React Three Fiber)** implementation, **Framer Motion** for animations, and **TMDB API** setup. **Zustand** was used with persistence functionality. First experience with **TypeScript**.
